

WARWICK

VERSATILE MODERN GEOMETRICS- PARKVILLE by Warwick

Overview: This captivating collection allows you to express a unique sense of style, whether its playful patterns and bold colours for a fun and vibrant mood or soft neutrals with contemporary geometrics for timeless sophistication, PARKVILLE's offer is eclectic and diverse on every level.

- **Inspiration:** Inspired by the diversity of today's design market, PARKVILLE is a plethora of colour and design with the ability to incorporate into transitional and contemporary spaces with ease.
- **Application:** Boasting a dry finish and beautifully light handle, PARKVILLE is a dual-purpose collection that will suit a wide range of furniture and drapery applications including washable bedspreads. This contemporary collection offers a two-tone aesthetic with subtle lustre while a cotton polyester blend creates a natural finish without compromising on durability.
- **Design:** PARKVILLE presents a unique geometric with an ethnic Ikat influence, while CAMBERWELL offers an organic circle design that contrasts perfectly to the modern features of RIPPONLEA in which small scale triangular geometrics take centre stage.
- **Colourways:** This mix and match range offers a comprehensive colour palette with refreshing hues that will complement existing interiors in effortless style. Bright colours such as Melon and Zest bring a breath of fresh air to interiors with an aesthetic that is vivid and playful, while Reef and Navy are examples of cool shades with a contemporary feel and refreshing perspective. Offering a relaxed mood and refined sense of style, neutral tones Raffia and Iron complement existing natural accents of wood and stone.
- **Rating:** With the added benefit of washability, PARKVILLE is the perfect way to introduce colour and design into both residential and commercial environments.
